Memorandum

To: Director Region 5, Office of Surface Mining
From: Area Mining Supervisor, WRMA
Subject: State of Utah, Division of Oil, Gas, and Mining
Observations Regarding OSM Comments Regarding the
Proposed Coal Exploration Plan of Meadowlark Farms.

The USGS concurs with the Division of Oil, Gas, and Mining observations of the OSM comments regarding the proposed coal exploration plan of Meadowlark Farms. In addition we would like to include the following:

1. A revegetation seeding mixture is provided by the appropriate surface managing agency if they consider the company's mixture inadequate. We respect the expertise of these agencies regarding revegetation.
2. An archeological clearance of the areas of operation is always required prior to our giving approval of any exploratory program.

Jackson W. Moffitt
